

PHAM GIA HUY - Front end developer

Contact information

- 🎂 Birthday: 14/09/2002
- 🏠 Address: Quan 1, Ho Chi Minh City
- 📞 Phone: 0789.653.678
- ✉ Email: pgiahuy653@gmail.com
- 🔗 Github: <https://github.com/giahuy405>
- LinkedIn : <https://www.linkedin.com/in/huy-pham-gia-76396325b/>

Objective

The type who likes problem solving and is passionate about new technology, has self-discipline and the ability to work effectively in a team.

Short-term goals: Proficient and get more experience in Typescript and learn webpack.

Long-term goal: My goal is to become a Middle Junior in the next 2 years. And improve my English, so i can work onsite at Singapore when i have 5-6 YoE. So I don't mind working hard to achieve it !

Note

Your have so much work to do ? You don't have time to test website ?

You can check out my notion link below. It contains video demo, you can quickly evaluate my ability.

Projects

1. Movie Booking Ticket

Summary : *This is a web application for a movie theater that allows users to buy tickets, reserve seats and manage their bookings. The website also includes an admin panel that allows administrators to manage movies, showtimes, seats and bookings.*

Feature :

- User authentication JWT (login and signup)
- User profile management (change password and update personal information)
- Movie listing (list of movies with their details such as title, description, image and ratings)
- Showtimes listing (list of showtimes for each movie)
- Seat reservation (user can select seats and buy tickets)
- Booking management (list of all user's bookings and details)

- Language selection (Vietnamese, Chinese, and English)
- Dark mode / Light mode

Tech : React, redux-thunk, Ant Design, TailwindCSS

 **Team size:** 2 member

My position: leader - project organization

 **Webiste:** <https://movie-2-llpf.vercel.app>

 **Github:** <https://github.com/giahuy405/Movie-2>

 **Account for testing:** giahuy4 / 123456 - giahuy5 / 123456 - admin : admin1@ / admin123

Video Demo : <https://www.youtube.com/watch?v=pzTrI6V9LBM&list=PL79mICTSqo26IDhL4M106tdWynyapwoSi>

2. Jira clone

***Summary :** This project is a clone of the popular project management tool, Jira. The project consists of a landing page, a login/signup feature, and a page with a Kanban board for managing tasks. Users can perform CRUD (Create, Read, Update, and Delete) operations for tasks, projects, and users. The project also includes a dark mode feature.

Feature :

- User authentication JWT (login and signup)
- Dark mode / Light mode
- Create a project / task / members
- Adding user to project and assign them to task
- Comment edit task

Tech : React, redux-saga, Ant Design, TailwindCSS

 **Team size:** 2 member

My position: leader - project organization

 **Webiste:** <https://jira-amber.vercel.app>
